## Summary

My research intersects Human-Computer Interaction (HCI) and AI, with a focus on Explainable AI (XAI). By defining **human-centered metrics** and conducting **large-scale user studies** on the effectiveness of XAI methods, I aim to **understand human users' needs and expectations for XAI** in supporting AI-assisted decision-making, in the context of fast-evolving AI models and diverse interaction interfaces. My research aims to motivate human-centered design for XAI systems.
